

INTRODUCING THE T-SLOT BLOCK

PATENTED WORKHOLDING

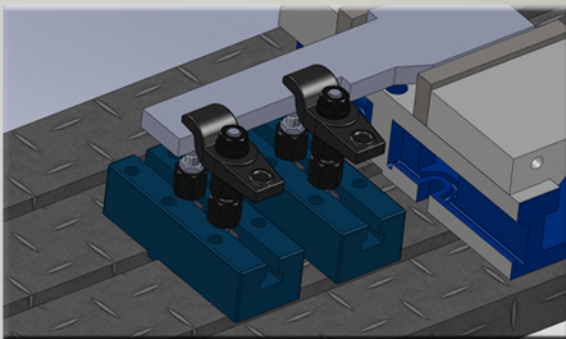

UNIQUE, VERSATILE, MODULAR

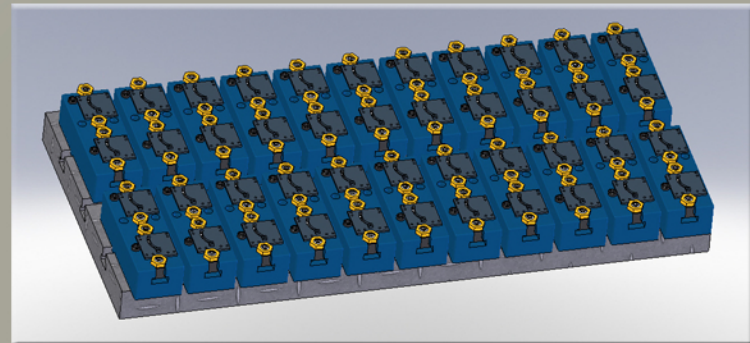

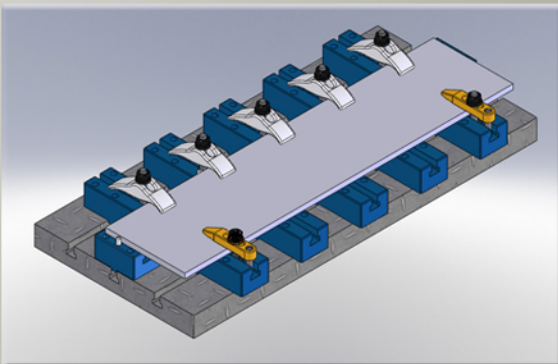

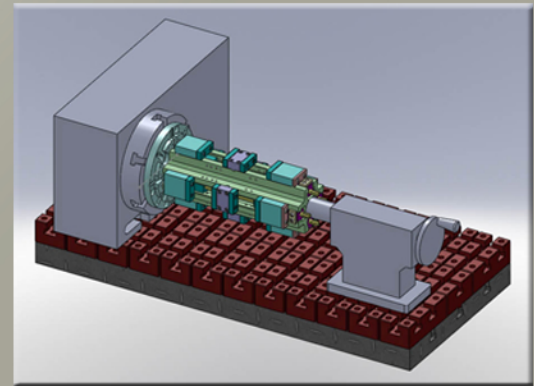

The T-Slot Block is a unique and modular work holding system, perfect for high density work holding and hard to hold parts. The T-Slot Block mounts directly onto your machine table, no need for mounting plates, or specialized hardware. Use your existing clamping hardware, such as T-Nuts, Studs, bolts, etc. Mounting tabs or locating tabs, are built into each T-Slot Block. The T-Slot Block comes in a variety of types and styles, with more on the way.

Mounting Tabs are built into each T-Slot Block. Alignment is perfect to the mill table. Each tab is made to fit a particular T-Slot size.

From simple work holding, to large part or high density, the T-Slot Block can offer more work holding choices, options, and save time and maximize available table space.
